

## CSSE Supports Youth Science Project

"The CSSE has supported science and engineering outreach to select high schools since the 1990's beginning with the NALTA project initially led by the University of Alberta and later extending to support for outreach via Vancouver's TRIUMF multi-university research facility and the University of Victoria via Dr. Lyle Robertson's collaboration with Parkland High School in Victoria."

These photos show CSSE President, Ken Putt, presenting a CSSE charitable donation cheque to the University of Victoria for support of their VICTA project, with Dr. Lyle Robertson, with the UVic Dean of Science, Head of the Department of Physics and Astronomy, and the head of the science department of Parkland High School."

A similar donation had earlier been made by CSSE President Putt to Dr. Robertson, also representing TRIUMF, at a Vancouver CSSE luncheon meeting."
